Are you looking to reduce your IT costs?

Are you evaluating moving to Microsoft 365 but don't have enough financial data to take the decision?

Have you compared the costs of running your IT services in your own data center versus moving them to Microsoft 365?

As your trusted Microsoft Partner, we are offering you a free Total Cost of Ownership analysis with data collected from your own environment and using transparent calculation methods.

We will compare the cost of running the following services versus using Microsoft 365:

Email Services

Users Personal Storage on File Server

3rd Party Application for file sharing and transferring

Files on Share Drive Servers

Chat Application

Online Video Meetings

Audio Calls between Offices

Anti-Virus

Single Sign-On

Device Management...

100% of the organizations to whom we delivered the TCO analysis discovered that it is more economical to move to Microsoft 365 rather than running your own IT systems on-premise.
